

DroneRules^{eu} PRO

Data Privacy Online Course

Training Session in Delft

25 September 2019

Faculty of Aerospace Engineering (AE), TU Delft,
Building 62, NB 2.51 – Meeting room 1
Kluyverweg 1, 2629 HS, Delft, Netherlands

You're invited to test our *Data Privacy Online Course* at a training session in Delft, the Netherlands. The course has been developed within the framework of the EU project *DroneRules PRO*. Bring your laptop and your questions, concerns and experiences. Join us and other professionals from the aerospace and drone industry, as well as data protection authorities, to learn how to recognise privacy and data protection risks and issues.

Throughout the day you will use our hands-on, gamified tool to help you identify good-practice solutions and how to implement them while you operate your UA safely. By the end of the day you will have a deeper understanding of how to use your drones in compliance with the applicable data protection laws and avoid liability risks and fines for yourself and your company.

The course has been developed for drone pilots, manufacturers and operators.

Participation is free of charge. Please register by email to info@dronerules.eu by Sunday 22 September 2019. All materials will be available in both Dutch and English.
