

# Remember to follow these rules for safety.

**A** Always fly your drone in visual contact. You are responsible for avoiding all other aircraft.

**B** Flying above crowds of people is forbidden. Do not cause any danger for other people.

**max. 150 m**

**C** Always fly below the altitude of 150m.

**max. 3 kg**

**D** Flying above a city or town is allowed if your drone's weight is 3kg or less and you have made sure the area is safe for flying.

**E** Respect other peoples privacy.

**F** Flying closer than 5km of an airport always requires permission from the air traffic control. Elsewhere in the airport's vicinity you should fly at altitudes less than 50m.

**G** Using common sense will get you far.

These are just the rules of thumb for flying a drone. More information can be found from internet.
